McGraw-Hill Publishing Co., Inc., 330 West 42nd St., New York, N. Y.

GENERAL INDEX TO VOLUME 90

JANUARY—DECEMBER, 1946

January	Pages 1– 73
February	" 74–144
March	" 145–215
April	" 216–284
May	" 285–355
June	" 356–430
July	" 431–502
August	" 503–576
September	" 577–651
October	" 652–727
November	" 728–806
December	" 807–890
Mid-December	" 891–952

A

Page

ACCIDENTS AND ACCIDENT PREVENTION

Alarm and shutdown instruments guard life and equipment. C. S. Beard pt 1 *310 pt 2 ... *366
Care and installation of compressed-air tanks. H. M. Spring ... 698
Safety in the boilerhouse. M. H. Kutner ... *596

AIR COMPRESSORS

Buffalo Niagara system equips three large boilers with compressed-air-soot-blowers. H. L. Smith ... *520
Causes of compressed-air explosion. Sumner, Rivett, Humphreys, Melrose, Hopkins, Kilburn, Belton, DeRosa, Demling, Parmer, Conk ... *780
Compressed air cooled by coil-in-pot cooler. J. D. Constance ... *853
Dust kept out of regulator by compressed air. J. T. Potter ... 258
Pneumatic instruments need clean, dependable air ... *763
Air conditioning—Pneumatic instruments need clean, dependable air ... *763
Man-made wind tests aircraft-engine gasoline injectors ... *6
American Institute of Electrical Engineers —Convention explores electronics and atomic energy ... *179
American Society of Mechanical Engineers —Full session ... *754
Meeting discusses new developments in gas turbine and boiler-plant practice .. *528
Report of meeting ... *931
Association of Iron and Steel Engineers— Report of Cleveland meeting ... *770

ATOMIC POWER

AIEE convention discusses atomic energy and electronics ... *179
Atom control transferred to civilian commission ... 648b
Economics of atomic power. P. W. Swain ... *368
Excerpts from Phil Swain's dispatches summarize bomb damage ... 503
Future of atomic energy in power production—study by Carnegie Endowment ... *742
Future of nuclear power. J. A. Wheeler. *174
Lilienthal Report on international control of energy-condensed ... *391
Oak Ridge, Tenn. atomic power plant planned ... 342
Power at Bikini. P. W. Swain ... *600
What's ahead in power. H. A. Winne ... *855

B

BEARINGS

Antifriction bearings change sliding friction to rolling. C. W. Pearsall ... *24
How to make a bearing for repair jobs .. *873
Individual design features suit each ball bearing to its job. C. W. Pearsall *317
This bearing failure strips turbine blades. G. Barrett ... *115
Wide range of designs fit roller bearings to each application. C. W. Pearsall ... *514
Belts—Conductivity test for rubber belts. R. E. Powers ... *45
V-belt failure stops driving motor. H. Moore ... *475

BOILERS

A.S.M.E. discusses new developments in gas turbines and boiler-plant practice. *528
Ash-disposal system built from junk. R. G. Swish ... *402
Benson steam producer evaporates high-pressure steam outside furnace. Mark Benson ... *663
Beware of boiler-water level: it may play you false. H. M. Spring ... *771
Blowdown tanks should be properly installed. H. M. Spring ... 620
Bypass valve regulates feedwater flow .. *473
Care of cast-iron hot-water boilers ... 534
Care of hot-water supply boilers and storage tanks. H. M. Spring ... 546
Care in operation of cast-iron steam boilers. H. M. Spring ... 400
Charts shorten time to calculate flue-gas moisture and volume. H. Richardson. *532
Chemical cleaning takes the bull work out of scale removal. pt 1 *586 Feller & Williams pt 2 ... *659
Chemical feeder serves a bank of boilers. E. D. Duff ... *257
Compressed air cleans boiler tubes ... *400
Compressed-air soot-blowing system on three large boilers. H. L. Smith ... *520
Conical holes air-cool furnace wall. C. J. Lloyd ... *622
Construction—firetube and watertube ... *832
Design and performance ... *842
Don't forget the blowdown valves. H. M. Spring ... *189
Eddy Co. mill, Canada, adds boiler to increase capacity and reduces steam costs 20% ... *286
Erosion of boiler tubes. Belton, Murray, Summer, Webber, Kilbourn, Goldsmith ... *476
Excess steam boilers use excess hydro power ... *856
Forced draft adds to boiler-room comfore. W. M. Gore ... 544
Heating straightens boiler staybolts. C. R. Kinney ... *620
How a ¼ inch pipe can explode a boiler. H. M. Spring ... *185
How large a furnace? W. A. Shoudy (Short cuts to plant efficiency) ... *460
Installation of cast-iron steam boilers. H. M. Spring ... 776
Inward boiler bulges merit practical attention. H. M. Spring ... *41
Load-distribution chart for boilers. Hoffman, Clark, De Rosa, Di Lorenzo ... *259
Long Island Lighting completes Glenwood Station. W. Welch Jr ... *20
Operation and maintenance ... *847
Patches for boilers: bolted, riveted or welded? H. M. Spring pt 1 *469 pt 2 .. *541
Preparing cast-iron boilers for inspection. H. M. Spring ... 327
Preparing steel heating boilers for inspection. H. M. Spring ... 474
Protecting two boilers with different pressures. H. M. Spring ... *402
Reclaiming flyash for burning. Lane Spring, Sumner, Hoffman, Pef, Schuster ... *625
Requirements for safety-valve setting. W. J. Birns ... 328
Safety in the boilerhouse. M. H. Kuhner. *596
Short cuts to plant efficiency. W. A. Shoudy ... *30, *101, 176, *314, *460, *526
Steam generation ... *805–852
Steam generators—firetube types ... *814
Steam generators—watertube types ... *820
Toronto Gas Company replaces nine hand-fired units with three stoker-fired boilers ... *432
Trouble-shooting chart. H. M. Spring (Power's Data Sheets) ... *877
Tube erosion a complicated problem. R. A. Lane ... 881c
Underpinning a 175-ft. operating smokestack Albert Di Giacinto ... *594
Vigilant inspection keeps unfired pressure vessels safe. W. E. Rossnagel *453
What will the postwar European power plants be like? S. A. Tucker ... *604
Welding repairs cracked boiler head. H. M. Spring ... *47
Wood refuse burns best in pyramid grates. H. J. Houser ... *699
Bushings—Drills oil grooves in long bushing. H. Moore ... *697
Buyers guide of power products and who makes them ... *891–928

C

Cables—Stripping cable insulation. D. H. Bergman ... *327
Calculator gives power factor. J. H. Kerr Jr ... *689

CANADA

Central stations installed or under construction since September, 1941 (able) 374
Eddy Co. mill adds boiler to increase capacity and reduces steam costs 20% .. *286
Hydroelectric projects built or on order in the U. S. and Canada in 1941–46 (table) ... 386
Castings, precision, made by mass production methods ... *463
Chemical Exposition highlights for the power engineer ... *247
Chimneys—Tearing down a brick chemney. Russell, Wyborn, Di Lorenzo, Hoffman, Belton ... *406
Underpinning a 175-ft operating smokestack. Albert Di Giacinto ... *594
China—plans world's largest hydroelectric power project ... *610

COAL

Avoiding spontaneous combustion. Arthur Belton ... 703
Charts shorten time to calculate flue-gas moisture and volume. R. Richardson ... *532
Conveyors for coal. Hartman, Morris, Clark, Conk, Wilkes ... *193
Fan eliminates frozen-coal trouble. P. M. Van Wingen ... 547
Jennison Station, Bainbridge, N. Y. burns anthracite ... *177
Pulverized-coal-fired power plant, mechanized handling and ash removal, Lee Rubber & Tire Co ... *750
Rapid detention of substandard coats. R. W. Gausmann ... 153

COMBUSTION

Charts shorten time to calculate flue-gas moisture and volume. R. Richardson. *532
Oxygen disappearance (chart) ... 462
Waste heat powers. Universal Atlas Cement plant ... *393

CONDENSERS

Condenser and steam-jet air ejector; a team for maintaining exhaust vacuum. Phil Freneau ... *75
How to compare steam surface condensers. C. I. Waddell (tables) ... *363
Old condenser tubes get new lease on life. F. F. Fisher ... *248a

CONTROLS

Alarm and shutdown instruments guard life and equipment. C. S. Beard pt 1 *310 pt 2 ... *366
Cincinnati pumps for flood protection present unusual problems of control .. *511
Fuel-oil heater temperature control. L. S. Dysart ... *881c
Graphs to simplify control terminology (ASME meeting) ... *935
Measuring and controlling temperature and pressure. E. W. Feller ... *215–246
Mercoid switch protects brine pump. Joseph Bongiorno ... *258
Motor-driven automatic timer matches generator voltage with process cycle. A. R. Wismer ... *161
Panama Canal diesels for third set of locks are started by automatic devices. J. L. King ... *613
Pneumatic instruments need clean, dependable air ... *763
Pressure regulation holds constant fuel-oil temperature. C. J. Lloyd ... *545
Refrigeration controls. Wenig, Carter, Wilkes ... *330
Rough-and-ready engine governor. C. R. Parker ... *547
Wyman-Gordon forge-shop heating and ventilating governed by remote control. C. J. Lloyd ... *252
Cooling towers—How the cooling tower does it job. J. Litchtenstein ... *691
Corrosion—National Association of Corrosion Engineers convention ... *465

(*) Illustrated. (Ed.) Editorial

Page

COSTS AND PERFORMANCE

Eddy Co. mill, Canada, adds boiler to increase capacity and reduces steam costs 20% *286
Forstmann Woolen betters plant operation by constant appraisal *154
How to calculate incremental production costs. M. J. Steinberg (charts) 444
Power station cost analysis (table) 744
Should a laundry buy or generate its electricity. J. G. Berger *457
Where gas turbines will fit in future power fields. Pfenninger & Tucker pt 1 ..... *728

D

Directory of manufacturers *891–928

E

Edwards, George—Better housekeeping, 562. Brevity is the Soul of Honesty, 878. Camp Kilowatts, 792. Don't believe all you hear, 418. Know-how or know-why?, 714. More-expensive engineers, 344. Nothing new-much, 490. Our need, 62. Plumber or Prince?, 204. Roast pork, 132. Town meeting, 273.

ELECTRICITY

Alarm and shutdown instruments guard life and equipment. C. S. Beard pt 1 *310 pt 2 ..... *366
Busbar spacing creates unbalanced circulating current in 3-phase system. L. G. Levoy Jr. *537
Big Inch and Little Inch used 3,500 kwhr a day to pump oil during the war J. L. King *81
Capacity of mercury-arc rectifiers 510
Changes in starting box remove trouble. W. M. Gore *697
Conductivity test for rubber belts. R. E. Powers *45
Copper strips on armature bands cause heating. R. O. Spencer 116
Correcting heater for oil-purification system. Wenig, McKane, DiLorenzo, Bennett, Noiles, O'Regan, Bergman, Haag, Matheson, Thomas *118
Did 3-phase motor start single-phase? M. A. Myers *474
Dow Magnesium speeds power for urgent process needs with new and rebuilt electrical equipment. Warren & Coughlin *166
Drying current from welding generators. R. G. Swisher *860
Electric heat cuts heater troubles. R. Boettinger *776
Electric steam boilers use excess hydro power in Switzerland *856
Electronics and atomic energy explored at AIEE convention *179
Electronic probe locates faults in heat-exchanger tubes *465
Hoist motor slow down. Roberts, Freeman, Webber, Kilbourn *121
How to correct wrong polarity. W. M. Gore 329
Insulation drying speeded by infra-red lamps. M. A. Myers *47
Insulation tests may be misleading. J. B. Mullins *622
Magnetic clutches. F. A. Annett *89–96
Motor-driven automatic timer matches generator voltage with process cycle. A. R. Wismer *161
Motor-generator exciters, McGraw-Hill Building, cooled by fans. Frank Schlieff *114
Motor operates at a critical load. H. B. McDermid *189
Panama Canal diesels for third set of locks are started by automatic devices. J. L. King *613
Reclosing field switch on generator operating. Hoffman, Rinehart, Coulden, Roberts, Eastcott, DeRosa *404
Removing motor coils. O'Brien, Hoffman, Wilkes *624
Rotor end thrust shifts brush assembly. R. O. Spencer 699
Safe operation in safety switches. M. A. Myers *188
Selection of generator for woodwork-working plant. J. M. Evans 879
Separate excitation for rotary converters. W. M. Gore *187
Service station for ailing submarines *187
Short-circuit analysis for small electrical systems. J. L. King *300
Should a laundry buy or generate its electricity? J. G. Berger *457
Spots on generator slipsprings. DeRosa, Mathews, DeCastro, Page, Carter, Webber, Wenig, Coulden, St. Laurent, May, Pollock, Lane *866
Standardized unit substations help solve industrial power problems. L. W. Long *582
Stopping generator-end play. Coulden, Mullen, Butcher, Wilkes, Roberts, Maher, Clark *49

Page

Stripping cable insulation. A. H. Langlois *327
Synchronous motor driving bandsaws, Hammond Lumber, dynamic-brakes its load *163
Tests faulty winding connection. M. H. Stutsman *544
Tests for reverse-connected coils. Henry Kleiber *623
USSR to double prewar power capacity by 1950 ..... *14
Unit substations fit any power system. L. W. Long *756
Voltage to drive shafts for woodworking plant. Vallery, Elkin, Roberts, Coulden, Butcher, Maher, Wenig, Hoffman, DeRosa *550
Weyerhaeuser Timber modernizes its electrical power system. K. L. Watts. *104
Why do rotor bars break in 30-hp motor? Pollock, Hoffman, Nutter, Parmer, Murray, Elliott, Erskine *778
Elevators—Motor-generator exciters, McGraw-Hill Building, cooled by fans. Frank Schlieff *114
Engineers—Suggested educational courses for steam power-plant operating engineers. J. D. Swenson *183

ENGINES—DIESEL AND GAS

Aircraft-engine gasoline injectors tested by man-made wind in laboratory *6
Check fuel-injection equipment to insure peak diesel efficiency *304
Cooling water quenches exhaust gas. G. M. Wilson *326
Developments in gas diesel discussed at National Oil and Gas Power Conference *437
Diesel and gas engine plants installed or on order since April, 1941 (table) 382
Disk expansion joint serves in close quarters. G. W. Wilson *328
Gas-diesel principle applied to supercharged and 2-cycle engines. Ralph Boyer *9
How does supercharging affect diesel-engine performance? Ralph Miller. *736
How to install and maintain diesel valves, seats and guides. J. D. Creek ..... pt. 1, *97; pt. 2, *164
Lube-oil shot makes engine start easily. D. H. Bergman *775
Menasha Municipal plant installs first supercharged intercooled diesel *449
Model of gas turbine *557
Oil-burner-barrel holder for cleaning. D. H. Bergmann *257
Panama Canal diesels for third set of locks are started by automatic devices. J. L. King *613
Rough-and-ready engine governor. C. R. Parker *547
Sulzer Bros., Switzerland, solves problems of highly supercharged diesels by research. S. A. Tucker *360
Unusual repair made on crankshaft. Stirling Cameron *696
Water-filled chamber checks exhaust sparks from internal-combustion engine. G. M. Wilson *473

ENGINES—STEAM

Foundation of concrete for pumps and engines. G. M. Wilson *544
Trouble with steam engine governor. Roberts, Page, Mullen, Goldsmith, Bender, Hudson, Patterson, Weber. *332
Valve gear causes steam-engine trouble. H. T. Livingston 347a
Vertical cross-compound corliss engine of 1600-hp, veteran of 45 years, gives way to electric power. C. B. Hudson. *693
What is wrong with this engine. Septor, Creighton, Fontain, Wilkes, Parks, Clark, DeRosa, Webber, Avis *190

EQUIPMENT

A C Motors, interchangeable *799c
Air appliance 207c
Air compressors 634
Air conditioning 200
Air duct 58
Alloys, Beryllium-Aluminum 421c
Alloys, silver-brazing 711
Analyzer, gas *558, 800b
Arc-welder *719-c
Arc-welder, packaged 645a
Arc welder, portable 634
Ash receiver and separator 789
Autoswitch, Watt-war 636
Balls, tungstein-carbide 788
Battery charger 800c
Battery storage *137a
Bearings, conical thrust 423c
Bearing, roller thrust 635
Bender, tube *137b
Blowdown disposal 136b
Blower, pressure *884c
Boilers 128
Boiler circulatory system 645c
Boiler, packaged 886a
Boilers, standard *558
Booster, condensate 788
Brace, sway *559
Brake, industrial 68b
Brake, magnetic-disk 200
Brazer, portable 350a
Breaker, emulsion 351a

Page

Burner, industrial oil *884a
Bursh, for small tubes *790
Bushing, ball *563
Cable splicer *563
Calculator, heat loss 884c
Capacitors, lighting 414
Carburetor 284a
Cell, dip—for testing *207a
Center finder 886a
Circuit breaker *59
Circuit tester 486
Circulators, air 636
Clamp, safety lifting 424c
Clarifier, water *885a
Cleaner, floor 351c
Cleaner, paint brush 495a
Cleaner, soapless 58
Cleaner, solvent 206b
Cleaner, steam 350b, 486
Cleaning unit *129
Clutch, automatic *58
Coating 139b
Coating, plastic 69c
Coating, protective 494c
Coating, refractory 558
Coating—silver brazing flux 494c
Colorimeter, photoelectric 414
Compound, calking 646b
Compound, sealing 283b
Compound, pipe-sealing 646c
Compound, washing 350c
Compound, welding 70b
Compressor, air *711
Concrete-floor dusting 644b
Condenser, refrigerant—gas 636
Conductivity cell *206a
Connector, monoblock *790
Connector, overhead 799a
Contactor, magnetic 138b
Contacts, electrical *206c
Control, acid-alkalinity 720a
Control, adjustable, for process work. *208b
Control, brake 68c
Control cabinets 494b
Control, combination welder 636
Control, combustion 798b
Control, feedwater 885b
Control, hydraulic *283a
Control instrument *711
Control, level *569c
Control, mill feed *570b
Control, motor 138b
Control, pulverizer 876
Control servomotor 798b
Control, temperature *129
Control, valve 138a
Controller *269
Controller electric *59
Controllers, magnetic crane 568c
Controller, photoelectric *710
Controller, pressure *136c
Controller, temperature *136b
Controls, remote *270
Converter, inch 569c
Conveyor trolley 350a
Conveyor unit *282a
Coupling *282a, 495c
Coupling, built-in 413
Coupling, compact 643c
Couplings, flexible 788
Coupling, fluid-drive 568c
Coupling, magnetic 270
Coupling, pipe *269
Coupling, safety hose *885a
Crane, gantry *874
Crane, many purposes *70a
Crane power traveler *790
Cutouts, oil-fuse 487
Cutters, circle *570c
Cylinder 201
Cylinders, air and hydraulic 422b
Cylinder, booster 634
Dampener, pulsation 636
Deburring tools *283c
Demineralizing unit for pure water. *799b
Descaler, evaporator 137c
Detector, defective-tube 488
Diaphragm cloth 351c
Diaphragm, fiber-glass 486
Diffuser, air 710
Diffuser cap 422e
Diffuser, dual air *876
Diffuser, fluorescent-lamp 720c
Diffuser, plastic 350a
Drill bit 282a
Drill, carbide masonry 885c
Drills, carbide tipped 721a
Drill, hard-metal 423c
Drill, masonry *710
Drilling-ratchet drill driver 422c
Drive, magnetic 128
Drive, stoker *712
Drying unit 200
Duct, electrical *70a
Ducts, flexible 201
Ejector, water *208c
Electrodes 282c
Electrodes, cutting 498b
Electrode for cast iron 646b
Electrode holders 570c
Electrode, self-hardening 635
Electrodes, stainless steel 341
Electrode, welding 283c, 876
Enamel finish 496b
Engine, diesel 200, 570c
Engine, gasoline *269
Expander, tube *208a
Extinguisher, hose reel 798c
Fan, corrosion-resistant *563
Fan, variable pitch 495c
Fastener, lock *137b
Fatigue machine *790

T

TANKS AND STANDPIPES

Care and installation of compressed-air tanks. H. M. Spring..... 698
Care of hot-water supply boilers and storage tanks. H. M. Spring..... 546
Corrugated jacket aids oil-tank heating. G. M. Wilson.....*698
Device used to cool and ventilate tanks and heaters. Ray Septor.....*326
Disk pinch-hits for a blank flange. D. W. Bergman.....*474
Dual-tank distant water-level indicator. G. M. Wilson.....*187

TURBINES—DIESEL AND GAS

A.S.M.E. discusses new developments in gas turbines and boiler-plant practice *528
Air-flow chart especially developed for gas turbines. W. M. Rohsenow (Power's Data Sheets).....*203
Annapolis experimental gas-turbine plant *271
Axial-flow design makes possible light, compact aircraft gas turbines..... *19
Closed-cycle gas turbine looks to further development. Dr. C. Keller.... *37
Coal-fired gas-turbine prospects bright.*157
Experimental unit at Annapolis yields high-temperature data. Tucker, Rettaliata & Kottcamp *290
Gas turbines. Rowley & Skrotzki..*667-686
Graphs to simplify control terminology (ASME meeting) *936
Mass production methods used to make precision castings of turbine blades..*463
Oil reservoir condensation troubles cured. W. M. Byars.....*329
Rumania's new locomotive power plant and largest gas turbine under test..*612
Sulzer Bros., Switzerland, research program develops new semi-closed cycle. S. A. Tucker.....*294
Where gas turbines will fit in future power fields. Pfenninger & Tucker pt. 1, *728

TURBINES—STEAM

Can exhaust turbines rejuvenate Liberty ships for postwar trade? S. A. Tucker *158
Consolidated Edison plans to complete waterside modernization. M. J. Sternberg *504
Dow Magnesium wrests magnesium from the sea with speedily-built power plant. J. P. Warren..... *74
Estimated turbine steam rates. (Power's Data Sheets) *637
Inhibitors in turbine oils reduce oxidation and prevent rust. Dr. E. W. Gardiner *169
Laboratory for teaching steam-turbine principles. Fisher & Harris.....*764
Mass production methods used to make precision castings of turbine blades..*463
Marion Station, Jersey City, high pressure unit No. 10 completes five years of service. R. A. Baker.....*578
Metalizing gives turbine new lease on life. H. M. Atwood..... *43
Steam generation *805-852
Steam-turbine size factor (Power's Data Sheets) *61
This bearing failure strips turbine blades. G. Barrett.....*115
Weyerhaeuser Timber Co., Washington, power plant proves its design and efficiency in fuel changes. T. W. Stewart *450
What will the postwar European power plants be like? S. A. Tucker.....*604

V

VALVES

Avoid false security by careful selection and testing of safety valves. W. E. Rossnagel *591
Clamp holds valve seat for grinding. J. F. Maher.....*117
Don't forget the blowdown valves. H. M. Spring *189
How to install and maintain diesel valves, seats and guides. J. D. Creek pt. 1, *97; pt. 2, *164
Improper assembly prevents valve opening. D. H. Bergman.....*622
Measuring and controlling temperature and pressure. E. W. Feller.....*215-246
Old valve used for throttling condensate. D. H. Bergman.....*545
Steam whistle used as fire alarm. D. H. Bergman 327
Temporary repairs on braken valves flanges. D. H. Bergman.....*696
Test stand for gas-engine valves. J. F. Maher *774
Valve stem extended for emergency closing *623

W

WATER POWER

Bonneville Dam *536
Bonneville hydroelectric plant's operating experiences for seven years.....*146
China plans world's largest hydroelectric power project *610
Electric steam boilers use excess hydro power in Switzerland.....*856
Hydroelectric projects constructed and operated by government agencies (table) 385
Location and capacity of government hydro projects (map)..... 390
Mexico features industrial program with power development *172
Reclamation Bureau power construction 202
Shawinigan Water & Power maintenance practices keeps hydro generators on the job. L. B. Stirling.....*617
Splits lever hubs for easy removal. H. B. McDermid *699
Switzerland plans power expansion....*599
